Symbols and Basic Techniques

折り図記号と基本の技法

- Solid bounding 外形線
- Valley fold 谷折り
- Mountain fold 山折り
- Guideline ガイドライン
- Turn over 紙を裏返す
- Fold over 折り畳む
- Fold and unfold 折り筋をつける
- Pleat fold 段折り
- Guide-point ガイドポイント
- Open or Closed Sink 沓め折り
- Zoom in 拡大する
- Angled rotation at X° X° 回転する
- Hidden paper 隠れた紙

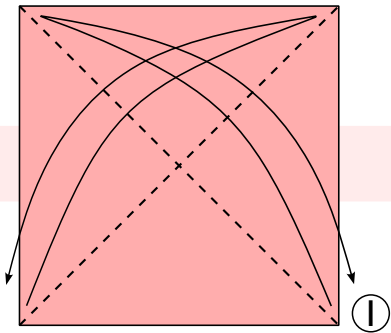

Developed by Arnav Avinash

This piece, as part of my work catalogue, has undergone multiple iterations over the past year. I now prioritize designs which seem achievable through diagrams and are easy to refold. This structure arose from an idea to graft over a bird base, using larger flaps for the hind legs.

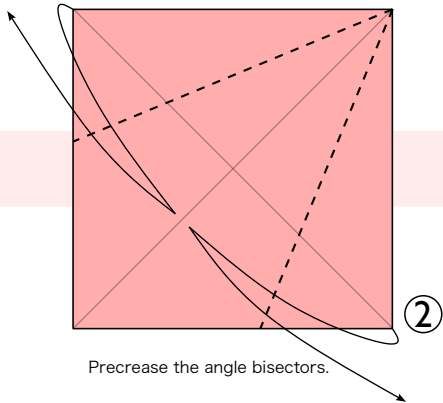

The complexity is rated at 75% citing step 52.
複雑度はステップ 52 を引用して 75% と評価されています。

Thank you!

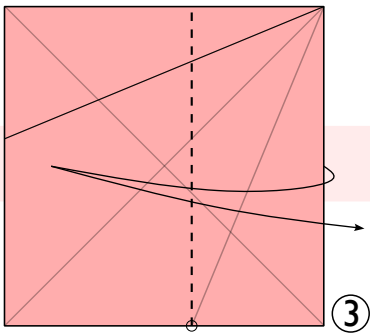

Fukuroi Kazuki and Morisue Kei (Japanese translation guidance),
Travis Nolan (guidance on dinosaur species and works).

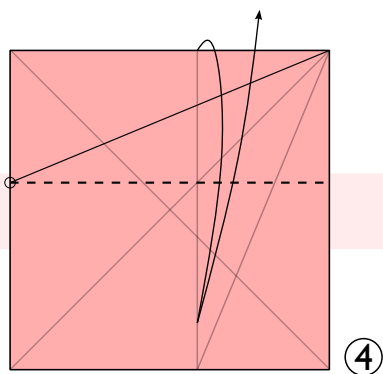

Fold in half and unfold on the diagonals.

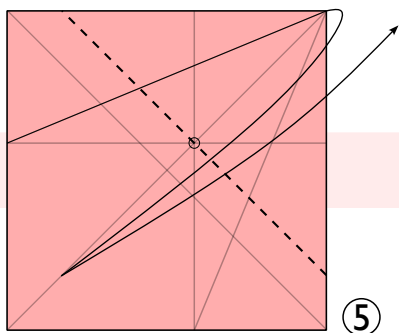

Precrease the angle bisectors.

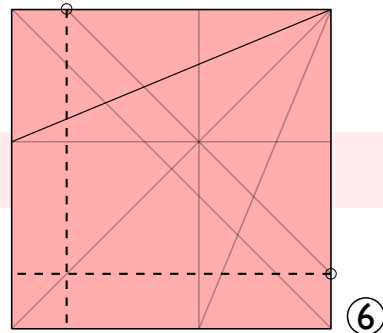

Fold over on the indicated reference, then unfold.

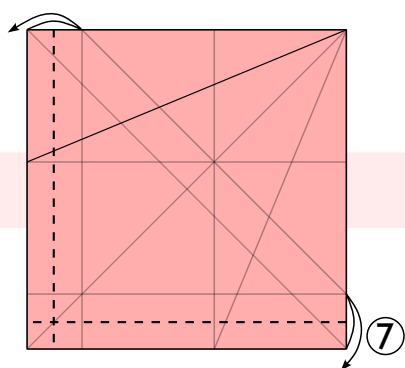

Repeat on the other edge.

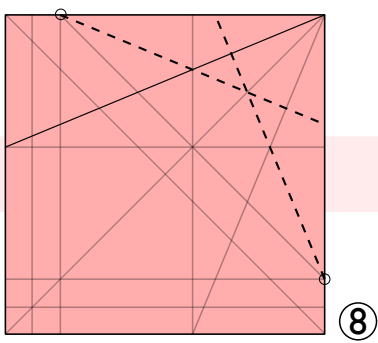

Crease at the intersection point.

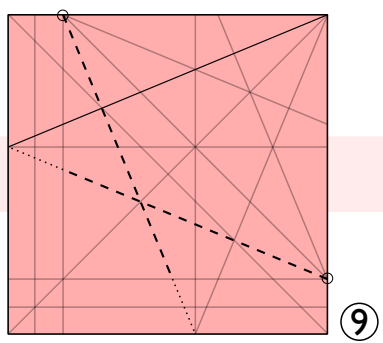

Fold and unfold, using the references.

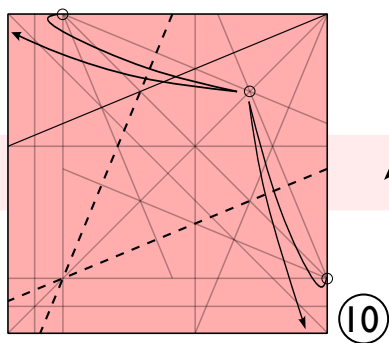

Bisect the previous crease.

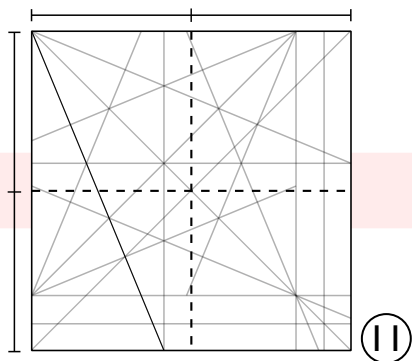

Precrease, as if for a rabbit fold.

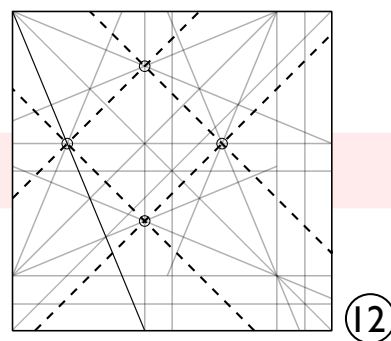

Repeat on the other side. Try not to crease completely.

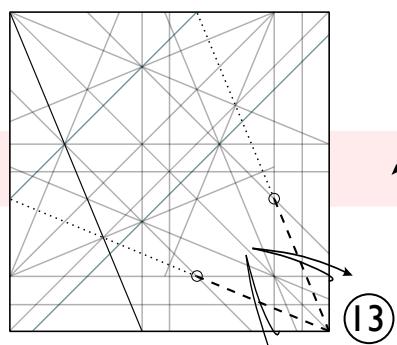

Fold over and unfold. You may wish to fold in half and mirror one crease.

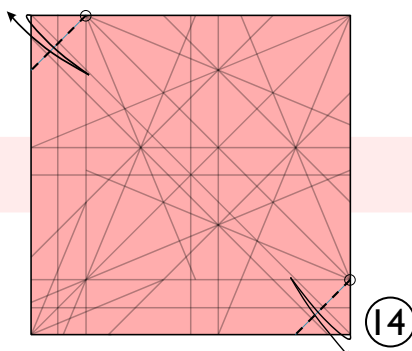

Fold in half and unfold.

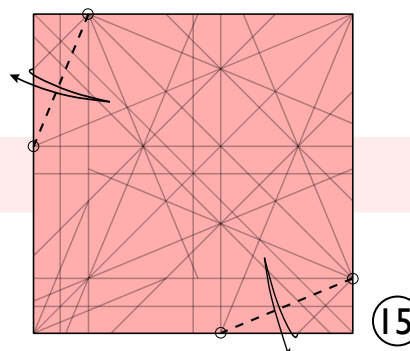

Precrease using the previous references.

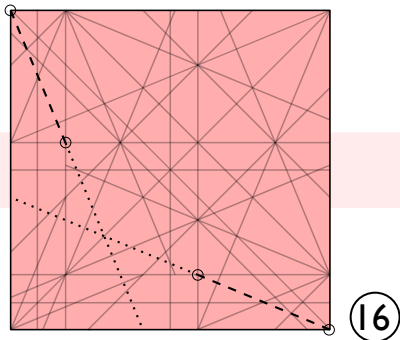

Angle bisectors, do not crease completely.

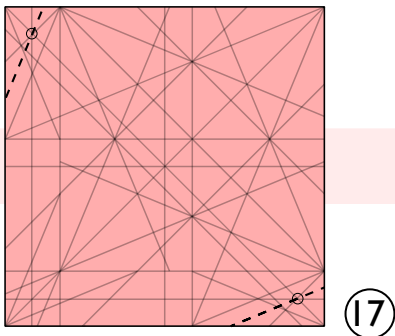

Henceforward, we shall use reference points to precrease.

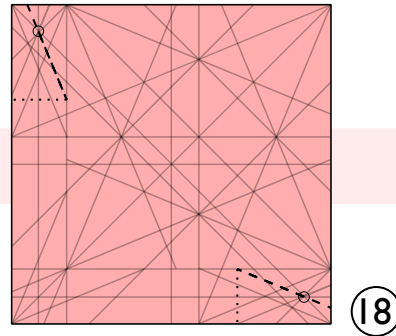

16

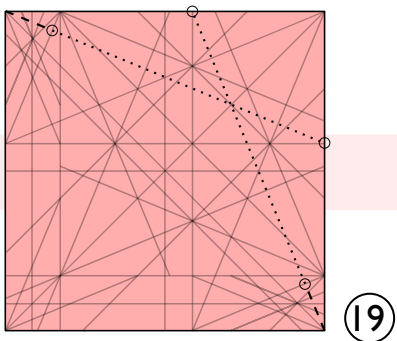

We shall omit the directional arrows for a few steps.

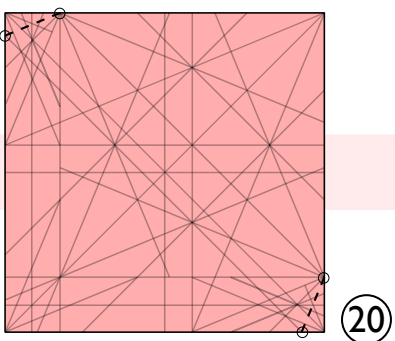

17

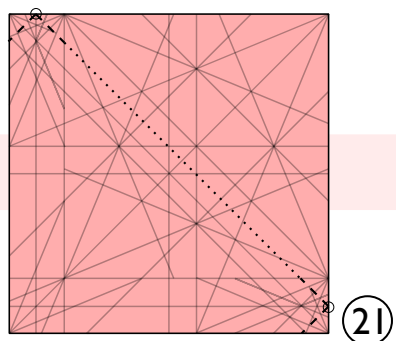

18

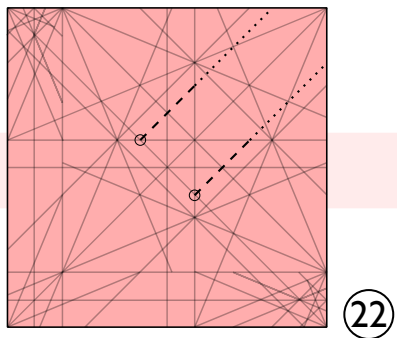

19

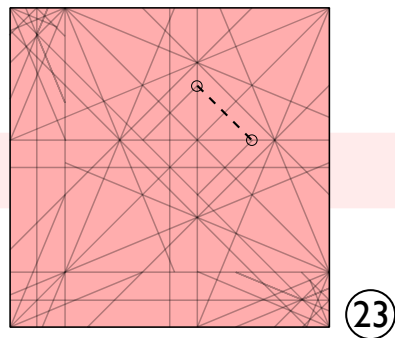

20

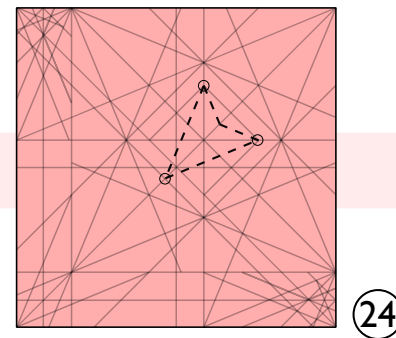

21

22

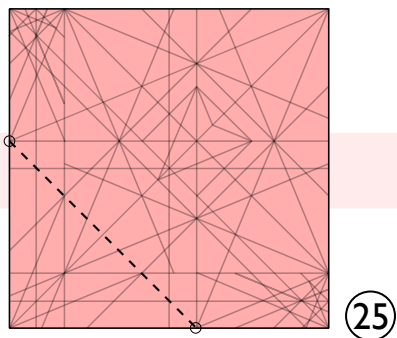

23

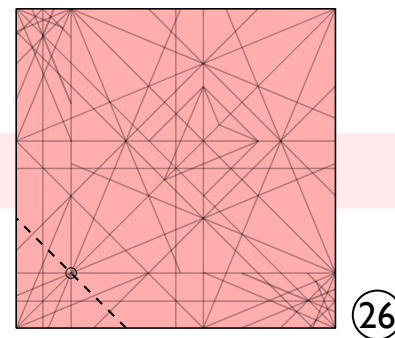

24

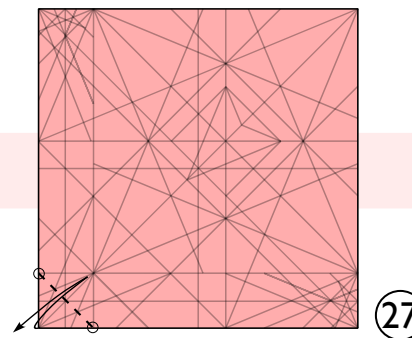

You may wish to fold in half and mirror the creases.

25

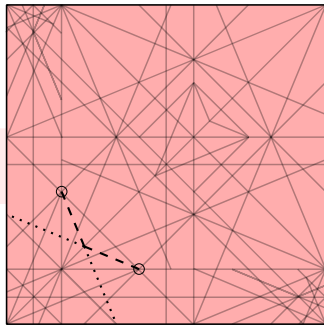

26

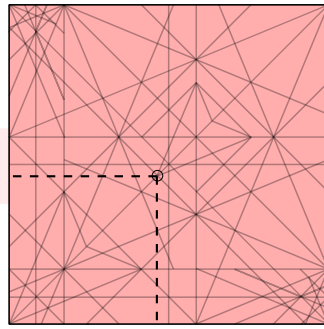

27

The arrow is convenient here.

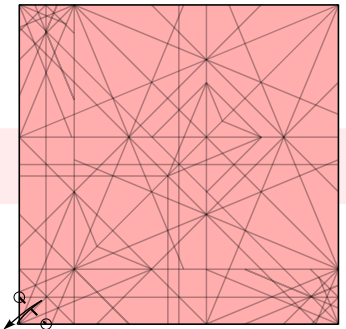

28

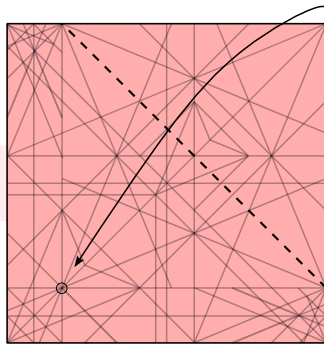

29

Be careful while creasing.

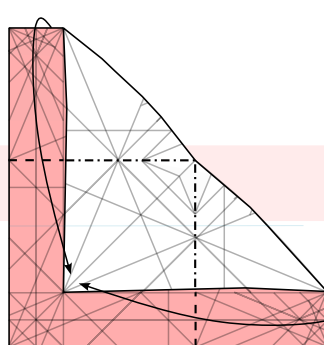

30

Hence, arrows shall return.

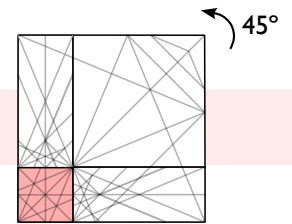

31

Fold the flap over.

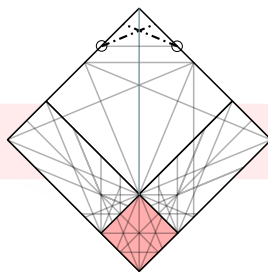

32

Perform inside-reverse folds to create a skewed preliminary base.

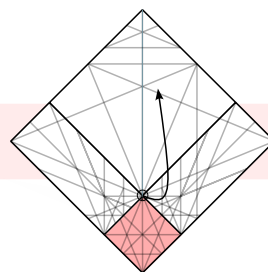

33

Rotate on the axis.

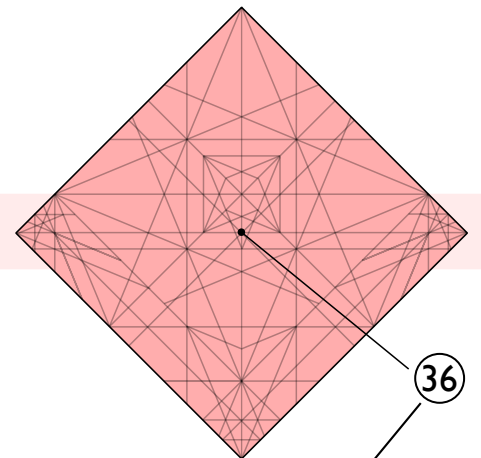

34

Precrease on the previously established reference.

35

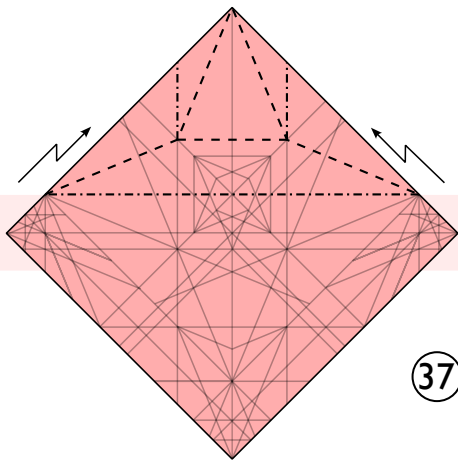

Unfold completely.

36

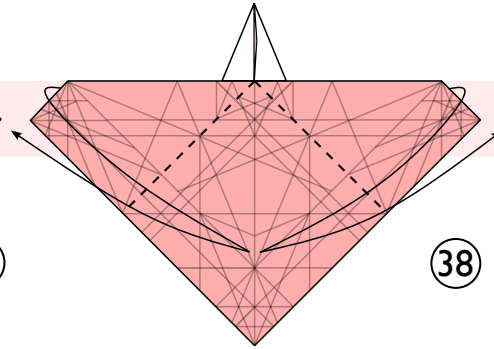

Precreasing is complete. We proceed to collapse the base into form.
折り畳みの準備は完了です。次は紙を元の形に戻す作業に移ります。

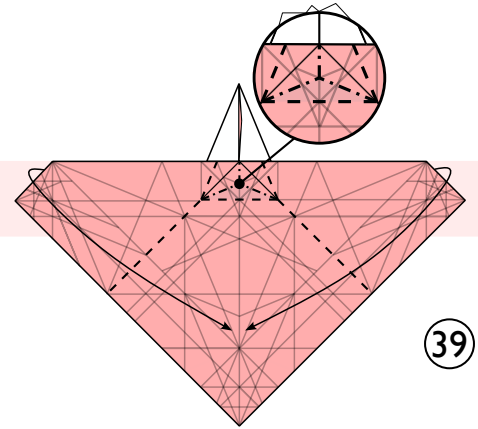

Partial petal fold and mountain fold.

37

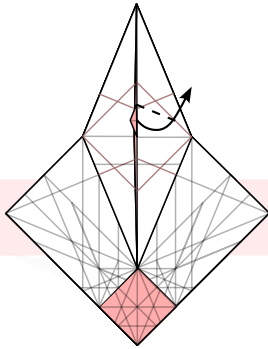

Fold and unfold to establish familiarity.

38

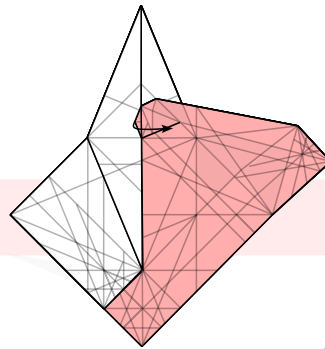

A slightly complex squash. Treat the top layer as one to fulfill this.

39

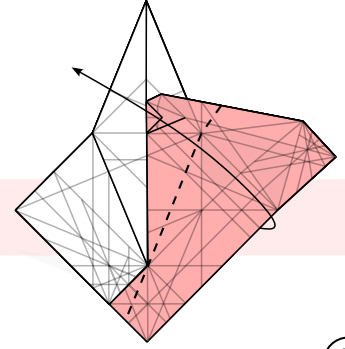

Fold the flap over.

40

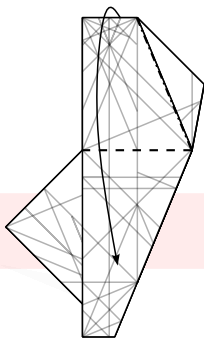

The result. Tuck the triangular flap into the gorge.

41

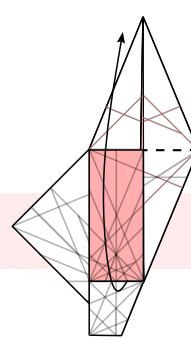

Fold over. You will have to create a new crease.

42

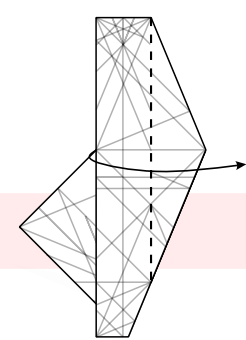

Petal fold when folding the flap down.

43

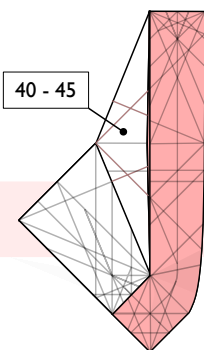

Fold back up.

44

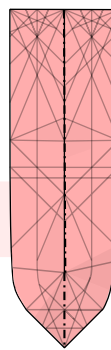

Fold over. The model will not lie flat now.

45

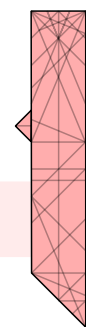

Repeat steps 40 - 45 on the other side.

46

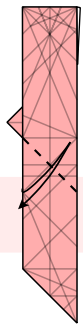

Mountain fold in half, allowing the flap to relax.

47

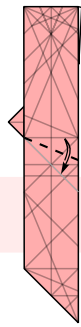

The result. The model should lie flat now.

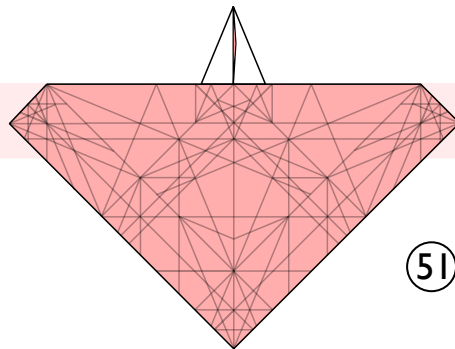

48

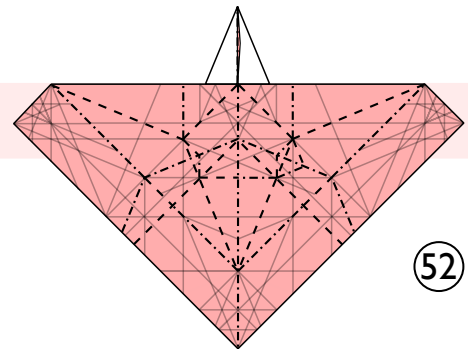

Fold and unfold. (49)

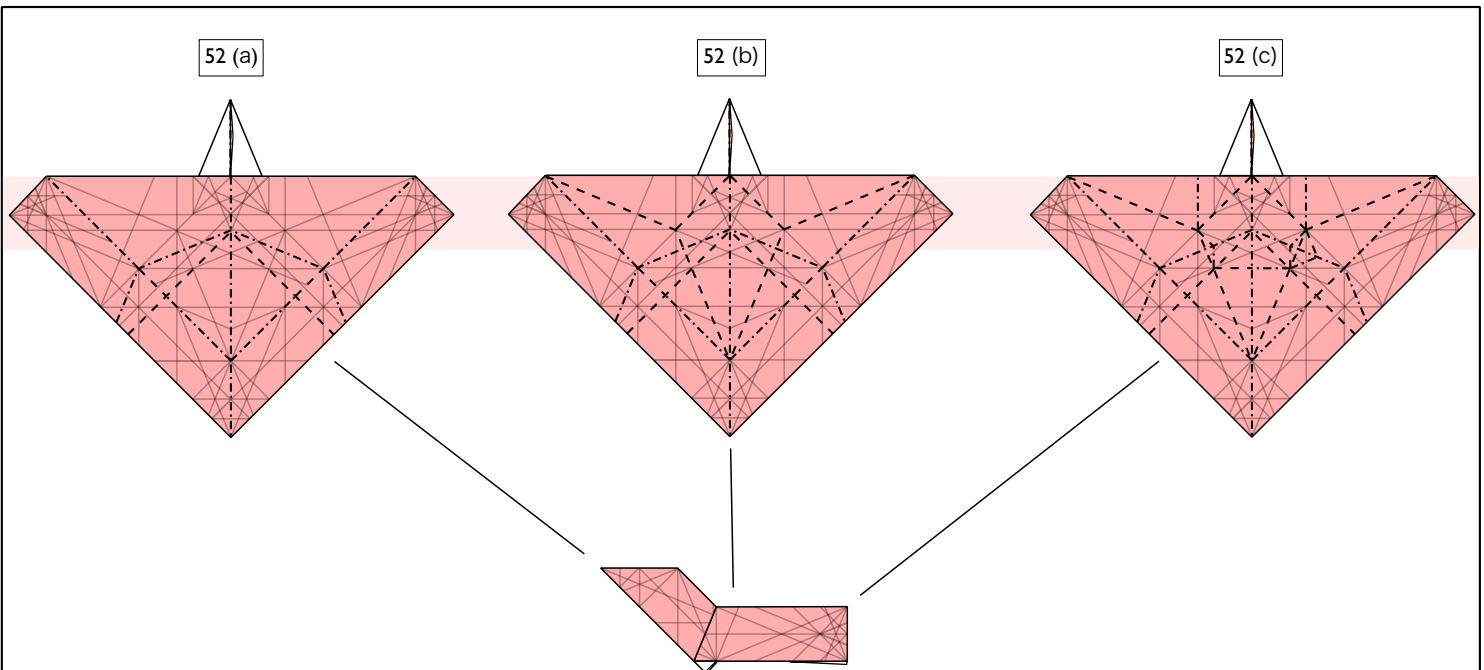

Bisect the angle. (50)

Unfold to mimic step 38.

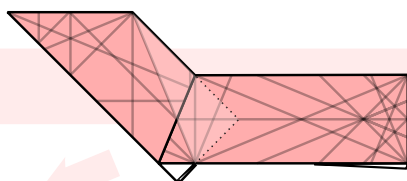

Perform a complex collapse! Below there are sub-steps to this.

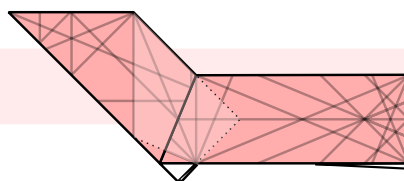

The base is complete. Post step 55, it is recommended to refer to the crease pattern.
The detailed creasing instructions are available, with shaping advisory.

ベースはほぼ完成です。
次に、頭部を強調した詳細な折り目付け手順を示します。

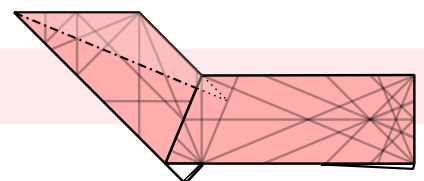

Unsink the flap.

(53)

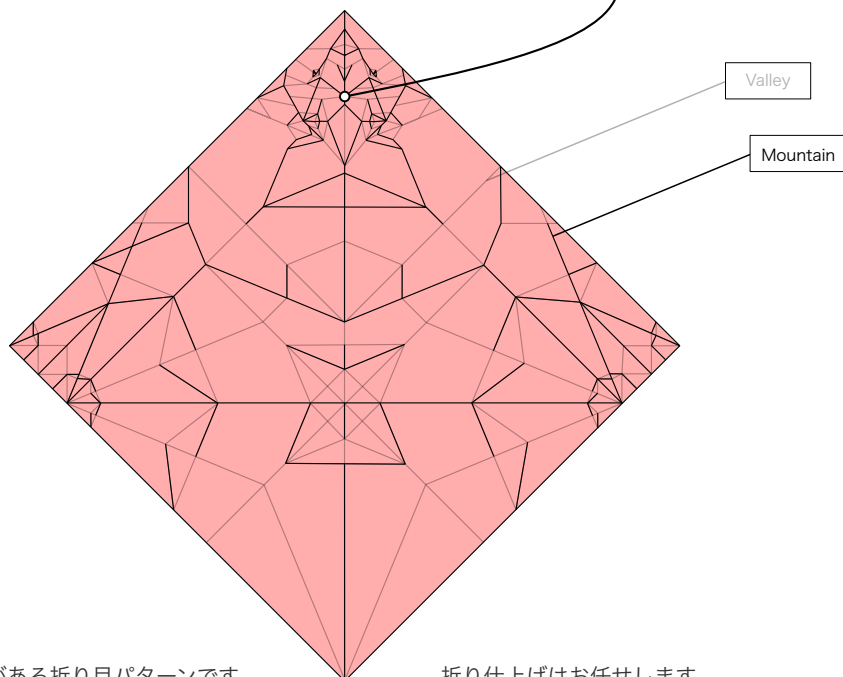

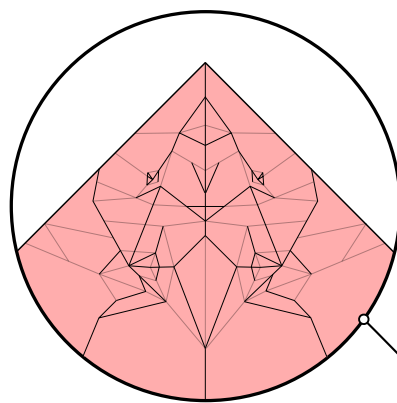

This should be the result.

(54)

Open sink the flap inside, using existing creases.

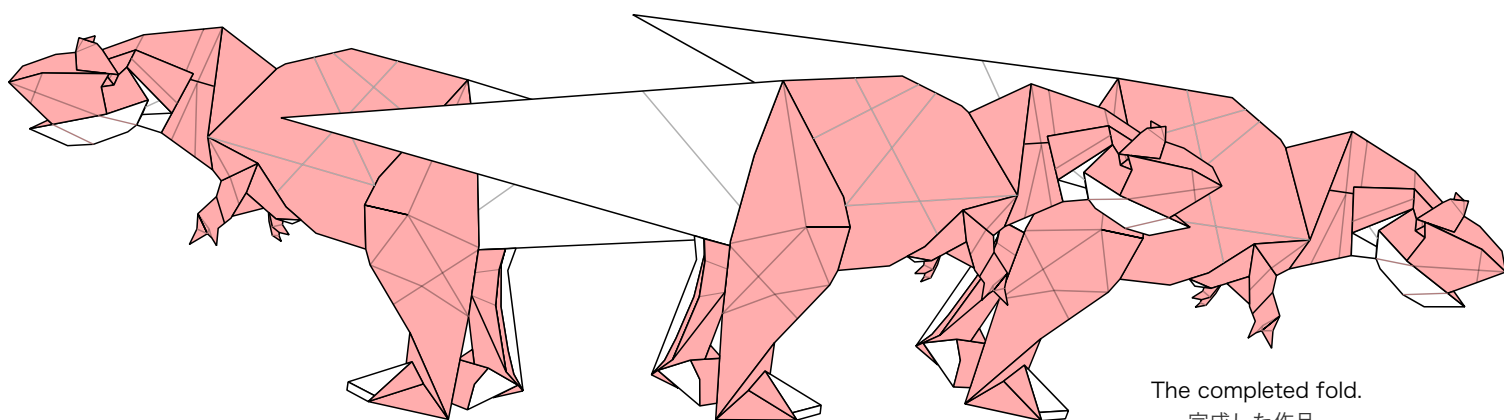

(55)

これは、頭部にいくつかの詳細がある折り目パターンです。

折り仕上げはお任せします。

Use this crease pattern to complete the basic details and the partial shaping.

The completed fold.
